

Specialty Reusable Bags

ECO Guardian's Specialty Reusable Bags are the smart choice! Made from recycled and/or biodegradable materials, our Specialty Reusable Bags cut down on waste and minimize damage to our environment, conserving oil, energy and most importantly, our non-renewable resources.

If not recycled, approximately 40 billion lb (18.14 billion kg) of PET (polyethylene terephthalate) will be added to our landfills in the next decade! Our PET Specialty Bags are made from 100% postconsumer PET packaging (such as recycled plastic soda bottles) which has been transformed into an eco-friendly and strong fabric.

Our Specialty Reusable Cooler Bags are a great alternative to traditional lunchboxes or plastic coolers. The inside is made of recyclable aluminum foil; the outside is a durable, easy-clean fabric (canvas, non woven polypropelene or PET). Switch to **ECO Guardian's Specialty Reusable Cooler Bags** and start reducing, reusing and saving money.

Customize our Specialty Reusable Bags with your company's custom colors and logos. Show your company's commitment to the environment!

Reduce waste in our landfills!

Make the sustainable choice:
ECO Guardian's Specialty Reusable Bags!

Advantages of an ECO Guardian Specialty Reusable Bag

- Reduces waste going into our landfills
- Saves our resources
- Easy care and simple to clean—machine washable
- Great for keeping foods cold or hot
